DETAILED ACTION

Applicant's election without traverse of specie I, figs. 1-3 and claim 1-5 in the reply filed on 4/22/2005 is acknowledged.

Claims 6-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/22/2005.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sugai et al. (US 4,326,846)

With regard to claim 1, Sugai et al. discloses a turbine motor for a pneumatic tool

Art Unit: 3721

(fig. 1), comprising: a casing (9), a chamber (18), an air inlet (14) and an air outlet (14), a rotor (2), disposed inside the chamber (18), an axis as shown by rotor shaft (20) carrying the rotor (2) having a rear end (see rear end on bearing 6) borne by the casing (9).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Anderson, Jr.

(US 3,880,245).

With regard to claim 1, Anderson, Jr. discloses a turbine motor (14) for a pneumatic tool (fig. 1), comprising: a casing (10), a chamber (16), an air inlet (25) and an air outlet (36), a rotor (15), disposed inside the chamber (16), an axis as shown by rotor shaft (21) carrying the rotor (15) having a rear end (25) borne by the casing (10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson, Jr. in view of Kakimoto (US 5,525,097).

Art Unit: 3721

Anderson, Jr. lacks a stator. Kakimoto teaches stator (101) inserted between a rotor (111) and an inner wall of casing (4).

Therefore, it would have been obvious to one skilled in the art at the time of the invention to provide the turbine motor of Anderson, Jr. with a stator according to the teaching of Kakimoto in order to support the rotor.

Allowable Subject Matter

Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The art of record fails to disclose or suggest a turbine motor for a pneumatic tool comprising a stator wherein the stator has a plurality of stator blades and wherein the stator is radially oriented and placed opposite the air inlet.

Conclusion

Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
